Our hardware is chosen for beauty, functionality and lasting performance.

REALCLOSET.COM

Nothing compares to the beauty and strength of **real wood**, that's why we use it in every one of our closets and organization systems. Since the beginning, our goal was to create an affordable real-wood closet with the look of custom cabinetry, because we believe everyone deserves a Real Closet.

Beautiful decisions COME NATURALLY

Real wood
MADE TRULY
AFFORDABLE

Built by a craftsman's passion.

With stunning details and real-wood construction, every Real Closet is a passionate tribute to custom handcrafted cabinetry. Our solid wood twin-beam shelf-edge moldings and all-wood dovetailed drawers yield remarkable beauty and strength for years to come. And our signature, double-bead edge profile adds a refined, furniture-style look to our solid maple drawer fronts, doors and shelf edges.

Durable to its core.

Built for lasting beauty and durability, the Real Closet partition and shelf components are carefully constructed with a 3/4-inch, 7-ply, CFC core plywood with a high-pressure laminated durable surface. Unlike industry-standard particleboard with low-pressure melamine paper that can easily chip or peel, our lightweight plywood core is dimensionally stable with powerful screw-holding capacity and excellent weight-bearing strength.

Real wood made truly affordable.

Examine our expert craftsmanship. Run your hand along our solid wood shelf fronts, drawers and doors. Scan our gallery of closet design combinations. Then compare our prices to any other closet maker. We're confident you'll appreciate the beauty and value of a Real Closet, and be amazed at how truly affordable having one for your own home can be.

Virtually hidden and more streamlined than other closet organization systems, the patented wall-mount rail system is the foundation of the strength of Real Closet.

Our standard 3/4" and twin-beam shelves are both constructed of a solid wood edge with plywood core.

All drawers feature solid hardwood dovetail construction with full extension glides.
